## PROFESSIONAL SUMMARY

---

Analytics professional who turns operational data into clear recommendations—identifying trends, presenting findings to stakeholders, and supporting adoption of better tools and processes. Combines risk analytics consulting and applied research with a human-centered leadership style: designing training curricula, coaching non-specialists through technical change, and leading cross-functional work from analysis through delivery. Uses modern AI coding agents and reproducible tooling (Typst, Docker/Dev Containers) to speed analysis, documentation, and training materials without sacrificing reviewability. Core stack includes Clojure, Python, SQL, Power BI, and Excel.

## PROFESSIONAL EXPERIENCE

---

### Hudson Memorial School

Hudson, NH

*Computers Teacher (Grades 6–8)*

Aug 2025 — *Present*

- Designed and taught an original Computers 6–8 sequence covering Excel data skills, HTML/CSS web development, and functional programming in Clojure
- Built the full curriculum from scratch (unit plans, Typst lessons, labs, assessments), using AI-assisted authoring workflows for slides and exams inside reviewable, version-controlled materials
- Ran project-based capstones, including partner websites and an algorithm-teaching final in the REPL

### Bowling Green State University

Bowling Green, OH

*Graduate Research Assistant*

Jan 2024 — Aug 2025

- Built automated cleaning and geocoding pipelines for Toledo Police Department data used in neighborhood-level crime analysis
- Delivered an interactive Shiny dashboard of crime and demographic patterns since 2010 for research and practitioner stakeholders
- Produced tract-level Prophet forecasts across six crime categories; co-presented findings at the 2025 Academy of Criminal Justice Sciences conference

### Eswatini Medical Christian University (EMCU)

Mbabane, Eswatini

*Computer Science Lecturer, Peace Corps Response*

Oct 2022 — Oct 2023

- Designed and delivered R-based AI/ML coursework and supervised undergraduate capstones, including a National Library System project
- Led university outreach as executive director of the EMCU TV YouTube channel

### Risk International

Fairlawn, OH

*Risk Analytics Specialist*

Oct 2021 — Oct 2022

- Built Einstein, an Advisen alternative risk management system for client reporting and policy benchmarking
- Engineered ETL pipelines and Power BI dashboards covering multi-line insurance programs for operational and executive review
- Delivered Total Cost of Risk (TCOR) analysis, program reviews, and recommendations used in client risk strategy discussions
