PROFESSIONAL SUMMARY

Analytics consultant who turns raw operational data into evidence-based recommendations clients act on—owning the path from SQL/ETL and Power BI (DAX) through stakeholder narrative, training, and adoption. Combines risk-analytics consulting (policy benchmarking, TCOR, executive reporting) with applied research that surfaces patterns from large, messy datasets, plus a track record of designing technical curricula and coaching non-specialists through tool and process change. Master's in Analytics (4.0); core stack Clojure, Python, R, SQL, Power BI, and Excel.

PROFESSIONAL EXPERIENCE

Hudson Memorial School (SAU 81)

Hudson, NH

Computer Science Teacher (Grades 6–8)

Aug 2025 — Present

- Designed and launched an original Computers 6–8 sequence spanning Microsoft Office Suite, web development, and functional programming in Clojure
- Authored the full instructional system from scratch (unit plans, Typst lessons, labs, assessments) inside Git-reviewed, version-controlled materials
- Ran project-based capstones including partner websites and an algorithm-teaching final in the REPL
- Coached non-specialists through technical change—scaffolding concepts for adoption rather than tool novelty

Bowling Green State University — Center for Justice Research

Bowling Green, OH

Graduate Research Assistant

Jan 2024 — Aug 2025

- Built automated cleaning, geocoding, and PostgreSQL-backed ETL pipelines for Toledo Police records—cutting manual processing 75%
- Shipped an interactive R Shiny dashboard of crime and demographic patterns for research and practitioner stakeholders ([MapApp](#))
- Produced tract-level Meta Prophet forecasts across six crime categories and 90+ census tracts on 500K+ records; co-presented at ACJS 2025
- Analyzed spatial autocorrelation in neighborhood crime patterns with GeoDa to ground policy-facing interpretation

Eswatini Medical Christian University

Mbabane, Eswatini

Computer Science Lecturer, Peace Corps Response

Oct 2022 — Oct 2023

- Designed and delivered five undergraduate CS courses—Foundations I & II, Data Mining (EDA), Regression Analysis, and AI/ML—end-to-end via Google Classroom
- Built an R-based analytics curriculum with hands-on programming exercises spanning EDA, regression, and machine learning
- Supervised capstone teams, including a Library Management System for Eswatini's National Library in Mbabane
- Led university outreach as executive director of EMCU TV, directing a promotional film for institutional visibility

Risk International

Fairlawn, OH

Risk Analytics Specialist

Oct 2021 — Sep 2022

- Engineered a centralized database of policies collected since 1986 to benchmark premiums, retention, and limits by line of business
- Owned ETL-to-dashboard delivery: SQL transformations through DAX into Power BI for operational and executive review
- Built Einstein, a bespoke Advisen-style Risk Information Management System for client reporting and decision support
- Influenced client strategy through TCOR analysis, program reviews, and broker-selection recommendations

Japan Exchange and Teaching (JET) Program

Sasebo, Japan

Assistant Language Teacher

Aug 2018 — Aug 2020

- Co-planned and delivered English instruction with Japanese Teachers of English across elementary and junior high
- Authored national-curriculum-aligned lesson plans for grades 3–9 with culturally responsive, team-based materials

Peace Corps

Luwazi, Malawi

High School Math & English Teacher

Jun 2014 — Jun 2016

- Taught Geometry, Algebra I & II, Precalculus, and English in a rural secondary school using resource-light methods
- Led applied community projects including a World Map Project and a malaria-prevention initiative

SELECTED PROJECTS

Tract-Level Crime Forecasting with Prophet

2025

- Meta Prophet across six crime categories and 90+ Toledo census tracts (500K+ records); presented at ACJS 2025

Toledo Crime & Demographics Dashboard

2024

- Interactive tract maps, rate/count views, demographic overlays, and police-sector boundaries from TPD and ACS data

Functional PCA in Clojure

2024

- PCA and eigendecomposition with Neanderthal / scicloj.clay; validated against scikit-learn

MLOps Pipeline for Brain Tumor Detection

2024

- Reproducible pipeline with DVC and GitHub Actions; topological data analysis with deep learning (92% ensemble accuracy)

Power BI Management & Hours Reporting

2022

- Centralized model with row-level security; director dashboards with hours roll-ups and dynamic EOY forecasts

Data Science with Clojure

2024 — 2025

- Interactive Clojure notebooks (scicloj/Clay, Quarto) with Dockerized reproducibility and Java/Python/R interop

EDUCATION

Bowling Green State University

Bowling Green, OH

- **MSc**, Analytics (GPA: 4.0) *2020 — 2021*
- **MA**, Cross-Cultural and International Education, Cognate in Mathematics (GPA: 4.0) *2017 — 2018*

TECHNICAL SKILLS

Analytics	Time-series forecasting (Prophet) · Regression · Machine learning · Clustering · Geospatial analysis (GeoDa) · Hypothesis testing · EDA
Data & BI	SQL · PostgreSQL · ETL / pipelines · Power BI (DAX, RLS) · Excel · Tableau · Dashboard design · Root-cause analysis
Programming	Clojure (Neanderthal, scicloj) · Python (scikit-learn, PyTorch) · R (Shiny, Caret) · Quarto / Clay notebooks
AI & Tooling	MLOps (DVC, GitHub Actions, MLflow) · Docker / Dev Containers · Git · Typst · Claude Code / Codex
Delivery	Executive & stakeholder communication · Technical training / curriculum design · Change adoption · Cross-functional collaboration · Conference presentation

CERTIFICATIONS

- TESOL, 120-Hour — UNI-Prep (2016) · Inclusive & Global Leadership Certificate — BGSU (2017)
